

PURDUE UNIVERSITY IN INDIANAPOLIS

INTERIOR ARCHITECTURE PROGRAM

TRANSFORM SPACES, SHAPE FUTURES

PURDUE
UNIVERSITY®

Polytechnic Institute

Blend of Disciplines for Innovative Spaces

At Purdue University in Indianapolis, the Interior Architecture major seamlessly integrates environmental design, architecture, technology, art, and construction. Our curriculum has been meticulously crafted to educate students to design indoor environments that are not only aesthetically pleasing but highly functional.

Curriculum: A Foundation for Excellence

Our program offers a robust blend of practical knowledge and design methodology and is accredited by the Council for Interior Design Accreditation. Students delve into courses that emphasize the health, safety, and welfare of the public in both residential and commercial settings. The curriculum is enriched with state-of-the-art concepts such as Evidence-Based design, BIM software, and 3D Printing.

Real-World Experience and Expert Faculty

- **Hands-On Learning:** Engage in service-learning activities with community partners for real-world experience.
- **Expert Mentorship:** Learn from faculty who are seasoned industry professionals with advanced degrees and specialized training.
- **Internships:** Invaluable real-world experience, offering a unique opportunity for learning, networking, and skill development in a professional setting.

Career Pathways

Upon graduation, our students are equipped with high-tech abilities and communication skills, ready to excel in diverse roles such as:

- Interior Designer
- Facility Manager
- BIM Technician
- Lighting Designer

Top Employers

Our graduates excel in securing employment with esteemed firms such as Perkins + Will, HOK, Gensler, Guidon Design, and CSO.

This program has been an excellent resource and provided me with opportunities to expand my design skills with like-minded individuals. I have enjoyed learning alongside passionate and creative students on community-based projects, and attribute my success to the professors, who never fail to challenge us to push beyond our limits and explore the endless possibilities of design.

MADDIE FERGUSON

I love the way that this major allows me to impact the health and wellness of our built environments. Studying coursework related to architecture, design, construction and other trades has provided me with multi-disciplinary skillsets needed to work in the modern workforce.
