CNIT 38101 - UML & MOBILE APPLICATION DEVELOPMENT IN PERÚ

Do want to:

- Visit distant and exotic places?
- Immerse yourself in another culture?
- Learn how to develop mobile applications?

Then join us for an exciting study abroad program at TECSUP in Lima, Perú!

In this class, you will examine the theoretical and practical applications of information systems modeling using unified modeling language (UML) as well as creating a mobile application for a smart phone using Phone Gap and JavaScript and then export that application to an iPhone or Android.

Outside of the classroom, you will experience the charm of Peruvian culture, the excellence of Peruvian cuisine, the excitement of Peruvian nightlife, and visit incredible sites, like the Amazon rainforest.
