TIPS FOR SCHEDULING ASSISTANT & MYPURDUE

o Be aware of linked courses, **some** lectures require that you register for a required linked section (lab, recitation, or PSO) that goes with it!

o **Tip:** Use Scheduling Assistant to quickly create a workable schedule. Scheduling Assistant will now transfer your courses directly to myPurdue. Always go into myPurdue and verify that all courses transferred in correctly by checking your week-at-a-glance schedule.

o If registering through myPurdue add/drop worksheet, you will need the CRN's for all parts of the class (lecture, recitation, lab, PSO).

PURDUE

BEFORE YOU REGISTER CONT...

SCHEDULE REVISION REQUEST (FORM 23)

Available tonight & at the CIT Advising Offices on the bulletin board

- o These are necessary for some course overrides.
- o Fill these out and complete them with <u>ALL</u> necessary information, including CRN's and any signatures that are needed from instructors. Form 23's need to be completed with the appropriate signatures and given to your advisor before you register.
- o This is **VERY** important so we can put in any overrides.

CIT PILOT COURSE SHEET

Please make sure and check the Pilot Course list. This will tell you whether the course listed <u>fulfills</u> a:
- o NET Selective or
- o Information Systems Selective

- Be sure you select the appropriate course that fulfills what you need on your Plan of Study. Also, check the Pre-Requisites for the course and whether it needs a signature from the Instructor.
  - o If you need consent from an instructor, you will need to complete a Form 23 and return to your advisor.

CIT PILOT COURSE DESCRIPTIONS

CNIT 48101 – IT Community Engagement – Professor Alka Harriger

A significant issue facing today's society is an insufficient number of computing college graduates, a phenomenon created in part due to negative stereotypes and the common lack of knowledge about IT careers. Some organizations engage in community outreach activities to spark interest in computing as part of their Corporate Social Responsibility (CSR) programs. This course will give students the opportunity to combine knowledge gained from their past and current Information Technology and related courses to develop engaging, interactive outreach programs for students in P-12. As a group, the class will assess and select the best activities for select P-12 groups and deliver the programs. Post-program evaluation will be used to improve their programs for subsequent use.

CNIT 48101 - Programming for Smart Health – Professor Alka Harriger

Students will research the state of wearable technology and smart health: mental, physical, and/or emotional. This study includes investigating multiple tools and platforms that support smart health applications, including usability, functionality, and user acceptance. Based on what students learn from their investigations, they will develop a prototype system/application that supports some aspect of human health.

CIT IS SELECTIVE OFFERINGS FLYERS

CNIT 38301 Packaged Application Software Solutions

In most organizations, purchased applications comprise 80% or more of the total information system application portfolio. In fact, the biggest and most expensive application in most organizations is their ERP. This course explores the full process of required to select and implement a commercial packaged application. It explores the make-versus-buy decision, business justification, requirements analysis, request for proposals, evaluation of vendor-proposed products, contracts for software and services, and implementation activities. (NOT a programming course)

Target Audience: Recommended for all information systems and systems analysis students, and those who want to become either consultants or software entrepreneurs. Also available to CS and MGMT/MIS students.

Prerequisite: CNIT 280 or 380, or CS 348, or MGMT 382

See myPurdue for days and times   Prof. Jeff Whitten (jwhitten@purdue.edu)

SPRING SEMESTER 2016

CNIT 55100 Information Technology Economics

Most students ultimately aspire to IT management, regardless of their area of specialization. If you want to be in management, you must learn to talk the language of business – economics, accounting, and budgets. This course explores the economics of information technology and its procurement from the perspective of financial management of IT within an organization. The course will explore both the IT project management and departmental budget perspectives.

Prerequisites:
For graduate students   NONE
For CIT undergraduates   CNIT 48000 and GPA ≥ 3.00

See myPurdue for days and times   Prof. Jeff Whitten (jwhitten@purdue.edu)

CIT IS SELECTIVE OFFERINGS

Cyber Criminology

Understand the who and why of cybercrime.

This course examines both the traditional and contemporary forms of cybercrime, including hacking, insider threat, Internet child pornography, cyberbullying, hacktivism, and cyberterrorism. Students will learn how computers can be either the target (e.g., hacking) or the tool (e.g., child pornography) for committing cybercrimes. In addition, this course will apply a variety of sociological, psychological, and criminological theories to help explain, "Why do some people engage in cybercrimes when others do not?"

No prior knowledge is required. All majors welcome.

STUDY ABROAD IN PERÚ
May 9 – May 23, 2016

$1,000 Purdue SA grants available,
3 credit hours, upper division NET/IS selective.

CNIT 399 - UML & MOBILE APPLICATION DEVELOPMENT IN PERÚ

Do want to:
- Visit distant and exotic places?
- Immerse yourself in another culture?
- Learn how to develop mobile applications?

Then join us for an exciting study abroad program in Arequipa, Perú!

In this class, you will examine the theoretical and practical applications of information systems modeling using unified modeling language (UML) as well as creating a mobile banking application for a smart phone using Phone Gap and JavaScript and then export that application to an iPhone or Android.

Outside of the classroom, you will experience the depth of Peruvian culture, the excellence of Peruvian cuisine, the excitement of Peruvian nightlife, and visit incredible sites, like Machu Picchu, the Amazonian rainforest, or Colca Canyon (2x depth of the Grand Canyon).

ENTREPRENEURSHIP CERTIFICATE

The purpose of the Certificate in Entrepreneurship and Innovation Program is to inspire and teach students in all disciplines to be innovators and entrepreneurs, whether they choose careers in start-ups or larger organizations. Through a series of five courses and related experiential programs, students learn the theory and practice related to starting and running new ventures, while turbo charging their degrees.

(Courses fulfill interdisciplinary selectives)

Eligibility
- The program is open to students in all majors who have approximately four semesters remaining in their academic programs. Upon completion of the requirements, students receive an official certificate, which is also recorded on their academic transcript.

Program Requirements
- Students must take the equivalent of five, 3-credit courses in the following categories:

Two Required Core Courses (6 credits)

    ENTR 20000 Introduction to Entrepreneurship and Innovation

    ENTR 31000 (formerly 201000) Marketing and Management for New Ventures (Pre-requisite ENTR 20000)

ENTR 20000 will be offered Mod 1 & 31000 will be offered Mod 2 for Summer 2016

OVERRIDES CONT.

Other overrides include:

- **Professor Permission** Override for CNIT 49900/58100 courses (*See Pilot Sheet)
  - A signature from the Instructor is **necessary** for some courses
  - Fill out a Form 23 with the CNIT 48101/58100 course and CRN along with the Instructor's signature and turn into your advisor before your registration.

- **Time Conflict** Override
  - If there is a time overlap of courses, it may be possible to get an override with the **permission and signature of the Instructor** whose course is overlapping. Form 23 must be signed and turned into your advisor.

OVERRIDE REQUESTS

PLEASE REMEMBER…

- If you write down a course on the Form 23 and you have not met all the Pre-Requisites, you will not be able to enroll.

- It is your responsibility to request overrides from the professor. This can be done by completing a Form 23 or by emailing the professor requesting the override. Copy your advisor on this correspondence.

- All override requests must be turned into your advisor at least **48 hours prior** to your registration. This is important because you will not be able to register for the classes you want unless we have put in the override request.

AFTER YOU REGISTER

CHECK LIST

- Print out your schedule from Week-at-a-Glance on the left side of the Academic tab on [myPurdue](). You will need to enter a date that is within the appropriate semester.

- Confirm your enrollment. (Enrollment confirmation can be completed on the Academic tab on [myPurdue]().)

- Pay your fees by the due date indicated. (A fee statement will not be generated until you register.)

- Monitor your schedule periodically on Week-at-a-Glance. Classes occasionally get moved, changed, or canceled. It is your responsibility to check your schedule and make any changes necessary.

- Read your Purdue email regularly. You should be notified if any changes have been made to your schedule.

ADDITIONAL INFORMATION

- **Waiting lists:** If you try to enroll in a class that is full and the course doesn't have linked sections, you may have the option to be placed on a waiting list for one particular section (CRN). It is then particularly important to monitor your Purdue email, so that you can respond within the allotted 16 hours.

- **Course Withdrawal:** A record of the fact that a student was enrolled in a course and withdrew from the course after the second week. When a course assignment is canceled prior to the end of two weeks of a semester or one week of a summer session, the course will not be recorded on the student's record.
