

SoET SUMMER STUDY ABROAD

GERMANY (DARMSTADT)

CLIMATE FRIENDLY SOCIETIES

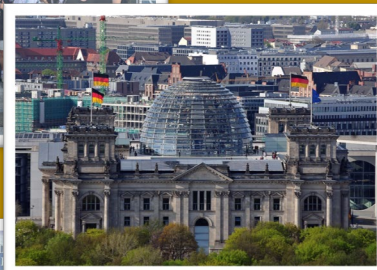

June 21 - July 17, 2025

Scholarships Available!

This course examines technical, economic, and governance aspects of sustainability and climate change through the lens of the UN's Sustainable Development Goals. Topics include energy systems, renewable integration, and the energy-water-food nexus, alongside governance analysis at global and local levels to explore climate-friendly transitions.

Program Educational and Cultural Highlights:

- **Visit Parliament:** Learn about Germany's climate policies and governance.
- **Meet Climate-Focused NGOs:** Engage with organizations working on sustainability initiatives.
- **Explore Climate Technology:** Discover innovations from leading technology organizations.
- **Experience German Culture:** Visit iconic locations, such as Berlin, Heidelberg, and the Rhine River Valley.
